- Cost Control Management
- Geological Testing
- Hazardous/Pollution Cleaning
- Arson investigation
- Management and Direction of Litigation Involving Various Property Damage Claims

Beginning with the pioneering of the fiberglass boat industry, Pearson Piles translated that success to fiberglass pilings knowing that the strength and durability of fiberglass would offer a great alternative to wood, concrete or steel as they will never rot, crumble or rust.

True to our deep understanding of working in marine environments, our pilings are non-polluting and will not leach harmful chemicals into the surrounding environment. The strength, longevity and low maintenance of our pilings also make them a cost effective solution compared to traditional options.

- Docks
- Stilt Foundations
- Marinas
- Fendering Systems
- Piers
